Important Note: These accounts can be accessed through website or mobile app (link is provided above).

Short Instructions: You can link your specific email account to gmail account in order to receive mails directly to your gmail account. This feature will pop-up after logging in for the very first time. Please have a time to go through all the features, as one can personalize his email as much he wants but if any one

doesn't want to personalize email account, he can simply skip those pop-ups. Lastly, the storage for each email account is 1GB and for more storage plan upgrade is required (starting from 1.65\$ per month [Server: Hostinger]). Password Change: Settings->preferences, you will find every options here. Recovery Email: Change this option at your own risk, it's not recommended to change it.
